LEVITON®

Decora Smart with Z-Wave Technology

Z-Wave Plus Product Family

The Decora Smart with Z-Wave Plus Technology family of products feature five devices including in-wall dimmers, a switch, and plug-in modules for appliances and lamps. The family of solutions utilizes the latest generation of technology for advanced wireless lighting control products. As well, an in-wall outlet featuring Z-Wave technology is available for built-in control.

Most devices support a wide range of load types including LED, CFL, and incandescent amongst others at various wattages with multi-way capability for large rooms or hallways. The products are Z-Wave Plus certified, ensuring increased communication range, network wide inclusion, and over the air updates.

The highly advanced design features two-way feedback, is scene capable, and is supported by security systems, hubs, and gateways that are Z-Wave enabled which provide remote access and scheduling.

In-Wall Dimmers and switches boast the new Leviton design with true rocker action, pressing the top to turn on and the bottom to turn off. For the 600W and 1000W dimmers, the dim/brighten bar is conveniently located along the right hand side of the paddle, ensuring ease of use with the state-of-the-art device. Vanishing LEDs to the left of the Dimmer paddle show current and target light level with real-time feedback. To meet any decor, color change kits are available in white, ivory, light almond, gray, black, and brown. For the most professional and cleanest installation, pair the device with an optional Leviton screwless wallplate.
Z WAVE PLUS

Features and Benefits

- Gloss finish complements any décor
- Compatible with Leviton vizia rf +
- Remotes available for 3-way/multi-location control
- Limited 5-year warranty

Z-WAVE PLUS CERTIFICATION

- Increased communication range
- Network Wide Inclusion
- Support for beaming and secure commands
- Over The Air (OTA) updates
- 500-Series Chipset
